

MOBILISE + PLUS

Mobilise Contractors & Shutdowns

Unlock a new era of efficiency and control in managing contractor mobilisation and shutdown worker oversight with Mobilise+. Our cloud-based platform revolutionises how mining companies seamlessly oversee and manage their contract and temporary workforce's health and well-being 24/7.

End-to-End Solution for Mining Companies:

Mobilise+ offers a versatile, multi-entry point platform that empowers mining companies to streamline the mobilisation process for contractors and shutdown workers. With real-time accessibility, this system ensures smooth onboarding, effective management, and seamless offboarding.

Empowerment at Your Fingertips:

Experience the power of "sign and send" functionality right from your device, enhancing convenience and efficiency in managing critical documents. Mobilise+ implements a risk-based approach, allowing you to onboard health risks directly into your organisational framework.

Recruitment/ Pre-Employment Made Easy

- ✓ Site-centric pre-employment process and documentation management
- ✓ Bulk upload of applicants
- ✓ Move workers between deployments and shutdowns.
- ✓ Workers complete medical documents online (any device)
- ✓ Upload any records (passports, licenses, Police checks, tickets, vaccines and health records)
- ✓ All medical information contained within the individual's health record
- ✓ E-mail questionnaire and records to any doctor anywhere for review
- ✓ Built-in approval process, SLA's, reminders and sign-offs as required
- ✓ Online access for HR/Recruitment staff to access at any time
- ✓ Medicals approved/not approved and digital sign-off
- ✓ Booking system allocates face-to-face if required
- ✓ Completed questionnaires risk-rated

Simplified Deployment Health Checks

- ✓ Ability for health practitioners to access the system
- ✓ Administer individual health needs i.e. diabetes, high blood pressure
- ✓ Deploy health questionnaires and surveys to maintain well-being
- ✓ Monitor regular health interventions, i.e. seasonal vaccinations, Covid/SAR's
- ✓ Health records can be moved from shutdown or deployment to deployment
- ✓ In-built health assessment builder for both physical and mental health checks
- ✓ Built-in reminders, recalls, actions, and overdue items
- ✓ Built-in appointment calendars and zoom TeleHealth
- ✓ Maintain all health records against each individual
- ✓ Monitor health results during deployments

Why Choose Mobilise+

- ✓ Efficiency Redefined: Streamline complex mobilisation processes, saving time and resources.
- ✓ Comprehensive Oversight: Manage every aspect of contractor and shutdown worker health
- ✓ Constant Connectivity: Stay connected with stakeholders and medical service providers.
- ✓ Anytime, anywhere and any device.
- ✓ Personalised Access: Ensure data confidentiality through tailored user access permissions.
- ✓ Elevate your approach to contractor management with Mobilise+. Experience a paradigm shift in efficiency, control, and well-being oversight.
- ✓ To discover the future of workforce mobilisation, connect with us and revolutionise the way you manage – with Mobilise+.
- ✓ Elevate Efficiency. Enhance Control. Empower Safety.

Mobilise+ – Redefining Workforce Management

Our cutting-edge system handles the entire spectrum of recruitment and pre-employment medical processes. This includes vaccinations, ID management, police check results, licenses, drug and alcohol test results, and health passports. Experience the ease of bringing new members on board while maintaining their health and well-being.

Security Overview

Our partners and clients can trust us to take care of their data, privacy and security requirements.

Oracle Cloud Services

Oracle data centres are Australian based and all data stored in either Melbourne or Sydney.

OCI Infrastructure

We utilise OCI cloud infrastructure deployed on autonomous databases only.

256 Bit Encryption

This encryption technique uses a 256 bit key to encrypt and decrypt data which is one of the most secure methods available.

EBS Volume Encryption

Elastic Block Security is an encryption technique which provides the ultimate protection for cloud storage and personal identity information.

Privacy Compliancy

We comply with ALL Australian privacy and data compliance requirements. We are an ACSC (Aust. Cyber Security Centre) Network Partner Organisation.

Live Monitoring

We utilise Oracle Cloud Guard for live monitoring, angle of attack and threat identification.
