# My Workplace Health

Cloud-based Health Software Solutions for all industries

Regarded as one of Australia's leading health software companies, My Workplace Health was born of a common goal to improve the health and wellbeing of the global workforce, and support organisations to implement positive change that is rewarding to both the employee and delivers positive outcomes for the business.

- **My Workplace Health** is a cloud-based health management eco-system used to manage the health and wellbeing of all employees.

- My Workplace Health is an **Australian owned** and **operated** Company, based in Victoria. All health data is created and securely stored in Australia on Oracle Cloud Web Service platforms.

- Our security infrastructure continues to be of paramount importance, and a defining component of our service strategy and business model.

Our Cyber Security

Our partners and clients can trust us to take care of their data, privacy and security requirements.

Oracle Cloud Services
Oracle data centres are Australian based and all data stored in either Melbourne or Sydney.

OCI Infrastructure
We utilise OCI cloud infrastructure deployed on autonomous databases only.

256 Bit Encryption
This encryption technique uses a 256 bit key to encrypt and decrypt data which is one of the most secure methods available.

100% Australian Owned and Stored

EBS Volume Encryption
Elastic Block Security is an encryption technique which provides the ultimate protection for cloud storage and personal identity information.

Privacy Compliancy
We comply with ALL Australian privacy and data compliance requirements. We are an ACSC (Aust. Cyber Security Centre) Network Partner Organisation.

Live Monitoring
We utilise Oracle Cloud Guard for live monitoring, angle of attack and threat identification.

ACSC Network Partner

ISO 27001 Certified

Our Track Record Speaks for Itself…

Prosperity Through Reputation
Regarded as one of Australia's **leading** health software companies, My Workplace Health was born of a common goal to improve the health and wellbeing of the global workforce, and support organisations to implement positive change that is rewarding to both the employee, and delivers positive outcomes for the business. Recipeints of a 2011 **Commonwealth Government** Commercialisation Australia Federal Grant, we continue to strive to be the very best and delivering client outcomes.

Happy Clientele Confirm Performance
We provide over **1100** organisations in **8** countries with their mental health and wellbeing software.
My Workplace Health has provided **Ambulance Victoria** with its services for **10** years, renewing its contract in 2020.

Application Security
- Two Factor authentication
- SSO (Single-Sign-On) deployable upon request
- Customer defined role-based security applied at a user level.
- Individual health data can be de-identified.
- Full password hardening invoked at a user level (SHA3 hashing invoked).

Enjoy the Benefits

Individuals can be confident that our software is secure.

Security Satisfaction
My Workplace Health has an outstanding track record of utilising and maintaining the ultimate security measures.

User-Friendly
Whilst user guides and videos are built in, our solutions are easy to deploy and use.

Security Permissions
User defined permission settings means that your information remains confined to your peer interaction on the day - no exceptions.

De-identified Statistics
All reporting remains de-identified, which means that your personal information remains just that- yours. All reports are void of identities.

System Silo
Your data is accessed only by Authenticated Users. Geo-Blocking of all countries where we do not work. VPN access only.

Freedom of Information
As per existing Australian regulations, you can access your data via freedom of information requests directly with your employer.

Testimonial
"I was having some problems at home and was a little concerned about sharing my personal information with a peer support work colleague. After arranging an appointment through the peer support program, I examined the confidentiality and security aspects of the program and software, and was more than satisfied that my records would remain confidential………" David.
